PROFILE

Detail-oriented QA Engineer with 2 years of experience in Manual and Functional testing. Skilled in analyzing incidents, tracking critical bugs in Jira, and collaborating with cross-functional teams (Product, Dev, Ops) to drive resolution. Proven ability to validate fixes in production environments and perform deep exploratory testing. Leverages technical knowledge of API and database tools to identify root causes and ensure seamless software quality.

EMPLOYMENT HISTORY

Tester Analyst, NEORIS

NOV 2022 - NOV 2024 | REMOTE

- Ensured quality for a large-scale e-commerce project within a multi-squad Agile Scrum environment.
- Executed comprehensive manual tests (functional, regression, usability) to identify and document critical defects.
- Validated data integrity and consistency by performing SQL queries, aiding in backend incident analysis.
- Designed and executed API tests using Postman to verify inter-service communication and backend fixes.
- Managed the full testing lifecycle, including defect tracking and reporting, using Azure DevOps.
- Contributed to maintaining high product quality and stable releases.
- Facilitated knowledge transfer and mentored new QA team members on workflows and best practices.

Education Sabbatical & Professional Development, Universidad del Sinu

NOV 2024 - DEC 2025 | MONTERIA, COLOMBIA

- Dedicated full-time effort to completing the final year of the Systems Engineering curriculum.
- Successfully finished all academic requirements, coursework, and final projects (Degree conferral pending).
